INTRODUCTION

The purpose in publishing the following list of the Industries and Products of the Province of Alberta, Canada, is to provide those interested with comprehensive particulars of the products manufactured or processed in the province, and the names and addresses of firms engaged in the various industries.

Since the year 1939 there was no trade directory published but it is now felt that a new one is necessary to meet the growing demands of Industry and to aid in increasing the already rapid industrial development of Alberta.

The Industrial Development Board through its Director, is co-operating to make this list as complete as possible, and in passing, it should be mentioned that the Board is in constant touch with sources of supply. It stands ready to assist and advise industrialists and those wishing to become established, in all matters relating to new and existing markets, and where advantageous to both producers and consumers, new industries are encouraged to locate in the Province of Alberta.

For markets Overseas it does not parallel nor overlap the work of the Federal Trade Commissioners, but it seeks to co-ordinate their efforts in relation to the economy of Alberta.

It is almost impossible to issue a list of industries which is one hundred per cent; every effort has been made however to have it fairly accurate, but in the case of errors and omissions the Department will appreciate receiving notification.

Alberta is indeed a wonderful province and its noteworthy development throughout the years has attracted the attention of industrialists and those interested in its untold wealth of natural resources. From a few industries in 1906 centering chiefly in agricultural products valued at \$5,000,000, to over 1200 manufacturing establishments in 1946 embracing in addition the wide fields of minerals, chemicals, textiles, leather, steel products, etc., all valued at \$257,000,000 is a noteworthy record as the following figures will reveal:—

LIST OF INDUSTRIES AND PRODUCTS—ALBERTA

Commodities are listed in alphabetical order, by cities, towns, villages, etc. Instead of furnishing the names and addresses of those engaged in each individual classification, industries are grouped, although the rule is not followed in all cases. This was done in order that small industries who failed to make a detailed report should not be overlooked.

If there are any omissions or errors in the following List, the Department will appreciate being advised of same.
